

Are You Ready for the Transformation of Health Care?

HealthParadigm can help you transition to the MACRA/MIPS era.

Medical Association of Georgia is partnering with KaMMCO Health Solutions to establish a physician-led health information network in Georgia allowing connected physicians and hospitals to share patient information.

As a result of establishing the network and enterprise data warehouse, business intelligence software is employed to deliver powerful analytic reports designed to enhance patient encounters and clinical outcomes, ultimately empowering physicians in the transition to the new health care delivery, quality reporting, and payment models.

- Support quality reporting requirements
- Access web-based dashboards
- Population health
- Improve patient outcomes
- Transition to alternative payment models
- Access longitudinal patient record
- Utilize secure messaging/DIRECT
- Personal health record
