

ACOs/CINs need comprehensive, integrated tools that connect the care team, provide more complete patient health records at the point of care, and deliver near real-time clinical analytics to the organization in meaningful ways.

The HealthParadigm suite of products and services can support your organization in the pursuit of delivering high quality, low cost care.

**CONNECT.  
ANALYZE.  
ENGAGE.  
TRANSFORM.**

There is no denying having the right information at the right time is one of the most critical factors in health care delivery and one of the biggest challenges.

HealthParadigm better positions participating ACOs/CINs seeking to improve quality and reduce health care costs while enhancing the patient experience by establishing disparate electronic health record (EHR) connectivity and delivering near real-time clinical data analytics.

The transformative HealthParadigm products and services include:

- Bidirectional EHR interface to improve care coordination between participating providers while working to reduce duplicative costs.
- Secure enterprise data warehouse allowing clinical and claims data to work together.
- High risk patient alerting when attributed patients are admitted to Emergency Department/Inpatient.
- Identification of attributed patients in need of preventive care and wellness exams.
- ONC-certified personal health record and DIRECT messaging.
- Assistance with GPRO reporting using ONC-certified eQMs.
- NCQA-certified quality measure for payer HEDIS reporting.
